

We claim:

1. A method of treating cancer in a human, which comprises administering to the human a combination of (i) a therapeutically effective amount of one or more arsenic compounds, and (ii) all trans-retinoic acid.
2. The method of claim 1, wherein the arsenic compound is arsenic trioxide.
3. The method of claim 2, wherein the arsenic trioxide is formulated as an ionic aqueous solution.
4. The method of claim 1, wherein the total daily amount administered of the arsenic compound is from about 10 g to about 200 mg.
5. The method of claim 1, wherein the total daily amount administered of the arsenic compound is from about 0.5 mg to about 150 mg.
6. The method of claim 1, wherein the total daily amount administered of the arsenic compound is from about 0.5 mg to about 70 mg.
7. The method of claim 1, wherein the arsenic compound is administered parenterally.
8. The method of claim 1, wherein the arsenic compound is administered intravenously.
9. The method of claim 1, wherein the all trans retinoic acid and the arsenic compound are administered in combination with an effective amount of at least one further therapeutic agent.
10. The method of claim 9, wherein the further therapeutic agent is a chemotherapeutic or radiotherapeutic.
11. The method of claim 9, wherein the further therapeutic agent is selected from the group consisting of etoposide, cisplatin, carboplatin, estramustine phosphate, vinblastine, methotrexate, hydroxyurea, cyclophosphamide, doxorubicin, 5-fluorouracil, taxol, diethylstilbestrol, VM-26(vumon), BCNU, procarbazine, cytokines, therapeutic vaccines, and immunomodulators.
12. The method of claim 2, wherein the dose of the arsenic trioxide is varied according to the body weight of the human.
13. The method of claim 2, wherein the cancer is a hematopoietic cancer.
14. The method of claim 2, wherein the cancer is a leukemia.
15. The method of claim 14, wherein the leukemia is an acute myelogenous leukemia.
16. The method of Claim 15, wherein the acute myelogenous leukemia is acute promyelogenous leukemia.

17. The method of claim 14, wherein the leukemia is a chronic myelogenous leukemia.
18. The method of claim 2, wherein the cancer is a lymphoma.
19. The method of claim 2, wherein the cancer is a solid tumor.
20. The method of claim 2, wherein the cancer has metastasized.
